SUMMARY

- He wanted more information on the site especially the access problems.
- Besides what is expressed in the fact sheet & addendum: I stated: - the history of our access problems
 - I told him I didn't really know why Skinner moved his fill to cover the buried lagoon and I wouldn't want to hazard a guess because of legal implications
 - We can still do RI w/ the conditions as they were 4/21/87
 - We would probably try an administrative order for access and non-interference.
 - Nearby wells are not being used and were tested any way, little was found.
 - We have tried "gentle" access agreements and not tried to interfere w/ Skinner's livelihood but may have to take firmer, more secure actions.
